Bahirdar

SKILLS

TECHNICAL

- Vulnerability Assessment
- Penetration Testing
- Security Audits
- Risk Management
- Security Compliance
- Incident Response
- Cyber Threat Analysis
- Network Security
- Technical Documentation
- Digital Forensics
- GRC Compliance
- System Administration

SOFT SKILLS

- Problem-solving
- Team Collaboration
- Adaptive Learning
- Strategic Planning

EDUCATION

Bachelor of Science in Cybersecurity

2022 - 2026

Bahirdar University

LANGUAGES

- English
- Amharic

SUMMARY

Aspiring Cybersecurity Professional pursuing a BS degree with training in ISC2 Certified in Cybersecurity (CC). Gained experience in security audits during an internship at INSA and developed hands-on SIEM deployment projects. Interested in bridging Governance, Risk, and Compliance (GRC) with technical security practices such as penetration testing.

CERTIFICATIONS

- › Completed ISC2 Certified in Cybersecurity (CC) Training Programme
- › Completed Certified Cloud Security Professional (CCSP) Training
- › Ranked in the top 6% globally in Advent of Cyber 2025 (24+ hands-on labs)
- › Received Certificate of Participation in Cybershield Showdown CTF organised by Yekolo Temari
- › Received Certificate of Participation in Local Coding Hackathon (Community Problem Solving)

PROJECTS

- › Designed and deployed a centralized SIEM lab using Wazuh to collect and analyze logs from Linux endpoints and visualize security alerts through custom dashboards.
- › Performed network traffic analysis using Wireshark to identify malicious communication patterns and potential data exfiltration attempts.
- › Performed network reconnaissance and vulnerability scanning using Nmap.
- › Tested OWASP Top 10 vulnerabilities (XSS, SQL Injection) in controlled lab environments using Burp Suite.
- › Conducted phishing simulation exercises using Setoolkit in controlled environments.

EXPERIENCE

Cybersecurity Intern | Information Network Security Administration (INSA)

June 2025 –
September 2025

- › Participated in penetration testing activities and security audits on critical infrastructure, ensuring alignment with INSA 29001 standards and documenting high-risk findings for remediation.
- › Conducted gap analyses and risk assessments mapped to ISO 27001, GDPR, and PCI DSS to strengthen organizational data protection and business continuity strategies.
- › Audited network architecture and validated data center failover protocols, helping ensure resilient backup systems and high availability for mission-critical services.
- › Collaborated with development teams to integrate security into the SDLC, performing web application testing and providing actionable mitigation strategies for OWASP Top 10 vulnerabilities.
- › Authored detailed technical reports for executive stakeholders, translating complex vulnerability data into prioritized risk-reduction roadmaps.

Cybersecurity Studies & Labs

January 2023 - June 2026

- › Studied core cybersecurity concepts including network security, cryptography, web security, system security, and digital forensics.
- › Conducted hands-on labs in penetration testing, vulnerability assessment, and network analysis.
- › Used security tools including Wireshark, Nmap, Metasploit, and Burp Suite during practical labs.
- › Identified vulnerabilities in web applications and systems in controlled lab environments.

Cybersecurity Community Mentor | Telegram

240+ Members

- › Managed a cybersecurity learning community with over 240 members.
- › Shared cybersecurity resources, labs, and learning materials.
- › Guided members on security fundamentals and best practices.
- › Encouraged discussion and collaborative learning among students.
